An All-In-One, Versatile POS

BROOKS POS

Brooks POS is a Cloud-Based commerce

system that offers seamless cash discount features, full white labeling for ISO groups and merchants, real-time terminal-centric reporting, and a simple to use merchant interface.

Brooks POS offers your merchants a terminal unlike any other. Powered by the PAX Android Series, the Brooks POS is an affordable and simple to use point of sale system. The power of an android terminal makes it possible for cloud-based real-time terminal-centric reporting, and other great value-added features such as employee time clock, inventory, and modifiers plus much more.
